PLAIN-LANGUAGE REPORT SUMMARY

From your report LDL cholesterol was 138 mg/dL. The lab range is below 100.

General information LDL is one measure of blood fats. A value above range is not a diagnosis.

AI interpretation Diet, medicines and fasting can affect this. Discuss with your doctor.

Concise | Detailed | Language: English

ASK ABOUT THIS REPORT

Why is my LDL high?

Records show LDL 138 on 09 Sep, up from 121 in March. Several causes are possible. I cannot tell which from these reports. Lipid_scan p1 LDL 09 Sep

Based on 1 unverified value
